EDUCATION

Istanbul Technical University

Expected June 2026

BSc in Electronics & Communications Engineering – GPA: 3.56 / 4.0

- Relevant Courses: Machine Learning, Artificial Neural Networks, Data Structures & Algorithms, OOP
- Certifications: AWS Certified Solutions Architect – Associate, Amazon Web Services

EXPERIENCE

BSH Hausgeräte / Bosch Group

Sep 2025 – Present

Data Science Project Student (NLP)

- Co-designed core components of an internal enterprise LLM platform used by 3,000+ monthly active employees, introducing reasoning-aware generation and token-level streaming, reducing response latency by ~40% and improving reliability in complex internal workflows
- Integrated custom MCP servers for internal Atlassian services (Jira and Confluence) to enable natural-language access to knowledge systems, cutting information retrieval time by up to 50%
- Implemented an LLM-driven batch HTML localization pipeline for 500+ enterprise webpages, achieving higher domain fidelity than traditional MT and reducing manual localization effort by ~70%

Airties

Aug 2025 – Sep 2025

Software Engineer Intern - Infrastructure

- Implemented and optimized CI/CD pipelines, updated automated linting, container scanning, and security check procedures, reducing deployment errors by ~30%
- Developed Go-based microservices to automate container and package transfers during repository mirroring (from Gerrit/GitHub → GitLab), improving full repository migration times by ~60%

Microsoft

June 2025 – Aug 2025

AI/ML Engineer Intern

- Designed and built phiDelta, a fully local AI research agent with planner-executor-evaluator architecture, enabling 50+ dynamic tasks with real-time reasoning, RAG, tool integration, and multimodal capabilities
- Developed end-to-end agent workflows with Microsoft Phi-4 and gpt-oss-20b models, improving tool execution reliability by 60% and cutting follow-up failure cases by ~40%, benchmarked across 30 scenarios

Arti ve Arti

July 2024 – Aug 2024

Cloud Engineer Intern

- Achieved a 70% reduction in manual data operations by developing a containerized database-monitoring tool
- Built an auto-scaling, load-balanced Apache cluster on AWS; sustained 2× traffic with zero downtime

PROJECTS

Istanbul Technical University

May 2025 – Present

Undergraduate Machine Learning Research Assistant

- Designed large-scale transformer-based computer vision models for crowd detection and counting, implementing custom encoder-decoder level modifications and advanced data augmentation strategies
- Built automated PyTorch training pipelines with distributed multi-GPU support (3× RTX 4090), managing 4+ server environments and experiment orchestration workflows, reducing experiment setup time by up to 90%

ITU BIOBEE Project Team

Oct 2024 – Present

Machine Learning Engineer

- Building an AI-driven object detection and EMG signal processing pipelines for a bionic arm prototype
- Achieved 4th place in the nationwide TEKNOFEST competition, outperforming hundreds of teams

SKILLS & INTERESTS

Languages: Python, Go, C, C++

AI / ML: LangChain/LangGraph, Large Language Models, AI Agents, MCP, Computer Vision, PyTorch

Cloud / DevOps: Docker, AWS, CI/CD, Linux, Git, FastAPI

Awards: National Quantum Computing Hackathon – TEKNOFEST: 1st Undergraduate Team
